RECTOR'S MESSAGE

Dear Students,

Erzurum Technical University (ETU) is a Turkish state university located in Erzurum, a prominent province of Turkey with its historical and cultural richness. In Turkey, there are 185 universities, yet just 8 of these are "technical universities".

ETU as one of these technical universities, has the vision to be a world-class university, which is well-known for its higher education quality and scientific researches; communicates with the society and produces scientific solutions for social problems; acknowledges life-long learning as a basic principle, and thus contributes to the spreading of information and science to every layer of society.

With this mission, we will be in an effort to offer new opportunities and horizons to our dear students.

Prof. Dr. Muammer YAYLALI Rector

ORGANIZATIONAL STRUCTURE

Erzurum Technical University was founded with the following units upon the decision published in Official Gazette no. 27648 of 21.07.2010.

R 7 I R I A THE TEXT THE TEXT

Snow crystal as one of the features of geography of Erzurum, which denotes elegance and transparency, is used as the basic image in logo design.

It also aims to transfer the city's historical and cultural fabric to the future by using Seljuk and Ottoman motifs used in the historical artifacts of Erzurum. To this end, hexagonal motif which is specific to the Seljuk architecture and art is used.

Inwardly directed arrows seen in snow crystal conjoints in the center. This symbolizes that the university as a whole has a common scientific social and artistic mission.

Arrows pointing outward represent the commitment of Erzurum Technical University to become a world-class university with its educational quality and scientific researches.

FRZIJRIJM FACULTY OF ENGINEERING AND ARCHITECTURE JULY FRSIT

FACULTY OF ENGINEERING AND ARCHITECTURE

Erzurum Technical University, Faculty of Engineering and Architecture aims to educate engineers who can generate solutions, committed to ethical values and are self-confident analysts in order to meet our country's increasing needs of engineers. To this end.

Department of Mechanical Engineering started education in 2012, followed by Departments of Civil Engineering and Electrical and Electronics Engineering, our faculty enriched its educational activities.

Along with theoretical education in engineering, in order to perform practices that are very important for internalization of theoretical information; modern student laboratories were founded at short notice in our faculty. Thus, our students obtain the opportunity to get prepared for the future in a more equipped way by performing the practices of the subjects they are taught in the courses in these laboratories.

One of the most important goals of our Faculty is that our students learn up-to-date information in the best way.

Within this context, in contrast to teacher centered education approach in which students just listen and are passive during lectures; in our faculty Flipped Classroom approach is used which provides active participation of students and allows assessment while the course is taught.

Our faculty widely uses new approaches in engineering education and with its young and dynamic teaching staff, it has been educating young people who will shape the technology of future.

DEPARTMENT of CIVIL ENGINEERING

Erzurum Technical University Department of Civil Engineering aims to train engineers who can play important roles in contracting services of Turkish construction firms which increases both inland and abroad day-by-day; in solving regional and national engineering problems and in increasing quality of engineering services.

DEPARTMENT of COMPUTER ENGINEERING

Erzurum Technical University, Department of Computer Engineering aims to train engineers who have the hardware and software ability to perform computer applications; have internalized inter-disciplinary work culture and developed joint work culture which is needed nearly in all engineering fields.

DEPARTMENT of ELECTRICAL and ELECTRONICS ENGINEERING

The aim of Erzurum Technical University Department of Electrical and Electronics Engineering is to educate electrical and electronics engineers who have understood knowledge, ability and technologies to design and analyze electronic systems which are in nearly every field of our lives; who can also employ these abilities in inter-disciplinary fields.

DEPARTMENT of MECHANICAL ENGINEERING

Erzurum Technical University Department of Mechanical Engineering aims to train its students as engineers who meet our country's mechanical industry's ever developing needs; by integrating theoretical knowledge with computer programming and laboratory practices in order to train engineers who can increase our country's competitive power.

FACULTY OF ECONOMICS AND ADMINISTRATIVE SCIENCES

Erzurum Technical University, Faculty of Economics and Administrative Sciences aims to raise leaders of private and public sectors who will shape the country's economy, administration and politics through adapting to changing environment. Besides this, we aim to make contributions to the solutions of provincial, regional and national problems by conducting scientific researches and publications and to be ranked among reputable universities and finally to become a preferred university, where the individuals are proud to be a member and graduate of both in national and international arena.

ETU-FEAS is in an effort to establish and develop close cooperations with its all stakeholders.

DEPARTMENT of ECONOMICS

Department of Economics aims to raise students who comprehend and develop solutions in both theoretical and practical levels to ever sophisticating economic relations and to economic problems arising out of globalization. Our mission is also to be a department which focuses especially on regional development activities with substantial projects and qualitative scientific researches. Major of Economics has been attracting students in recent years due to economic developments. Graduates of the department would select academic career as an option and be also preferred in public organizations, banks, insurance and audit firms, financial institutions and other international firms for administrative positions.

DEPARTMENT of BUSINESS ADMINISTRATION

Department of Business Administration aims to raise qualified human resources needed in organizations producing economic value in the forms of goods and services to reach the goals of sustainability, competition and productivity in the fields of management, planning and audit. It also aims to provide consultancy services to firms; and to make contribution to academic literature through conducting researches and publications at international levels. Graduates of the Department would have positions in management, production, finance, accounting, marketing and human resources departments both in national and international organizations.

"PROGRESS in TURKISH MONEY and CAPITAL MARKETS" PANEL

Our university's Faculty of Economics and Administrative Sciences held the panel discussion titled "Progress in Turkish Money and Capital Markets". Under our Rector Prof. Dr. Muammer YAYLALI's moderatorship, Chairman of Capital Markets Board of Turkey Mr. Vahdettin ERTAŞ, Chairman of Banking Regulation and Supervision Agency Mr. Mukim ÖZTEKİN, President of Turkish Statistical Institute Mr. Birol AYDEMİR participated in the panel discussion.

FRZIJRIJM TFC FACULTY OF LETTERS AT LINIVFRSITY

FRZURUM TFC FACULTY OF LETTERS A LUNIVERSITY

FACULTY OF LETTERS \(\nbeggright\)

Erzurum Technical University Faculty of Letters was founded in 2010 as one of the 6 faculties with Department of American Culture and Literature, Department of Philosophy, Department of Sociology, Department of History and Department of Turkish Language and Literature. While the departments of Turkish Language and Literature, History and Philosophy started education, remaining departments are planned to start education activities within the shortest time.

Progress has been achieved in forming a comprehensive Social Sciences Library within the body of University Library in an effort to provide our students the opportunity of reading in their fields and reaching as many sources as possible.

Various conferences and panels were held on history and literate by faculty members of our university and other universities. Our activities are planned to continue.

Within the body of our faculty "History Club" in 2014, "Thought and Philosophy Club" and "Turkology Club" in 2015 were founded. Collective scientific, social and cultural activities have been held by students and faculty members in these student clubs.

DEPARTMENT of HISTORY

Since the establishment of Department of History, faculty members organized various panels, conferences and art exhibitions. Our faculty members organized city tours to historical artifacts of the province for junior students coming from out of Erzurum.

DEPARTMENT of PHILOSOPHY

Department of Philosophy started education in year 2014-2015 academic year with 40 students. Our aim is to raise individuals and researchers who are rational and whose aim is to rule instead of being ruled.

DEPARTMENT of TURKISH LANGUAGE and LITERATURE

Department of Turkish Language and Literature aims at on the one hand educating students to ensure that they learn Turkish language and culture; become capable of reading through, analyze a text and acquire oral and written skills and on the other hand aim to improve creativity and offer new perspectives to social sciences and humane dimensions to sciences. Therefore, we offer history, sociology, culture and communication courses to our university's students in various departments.

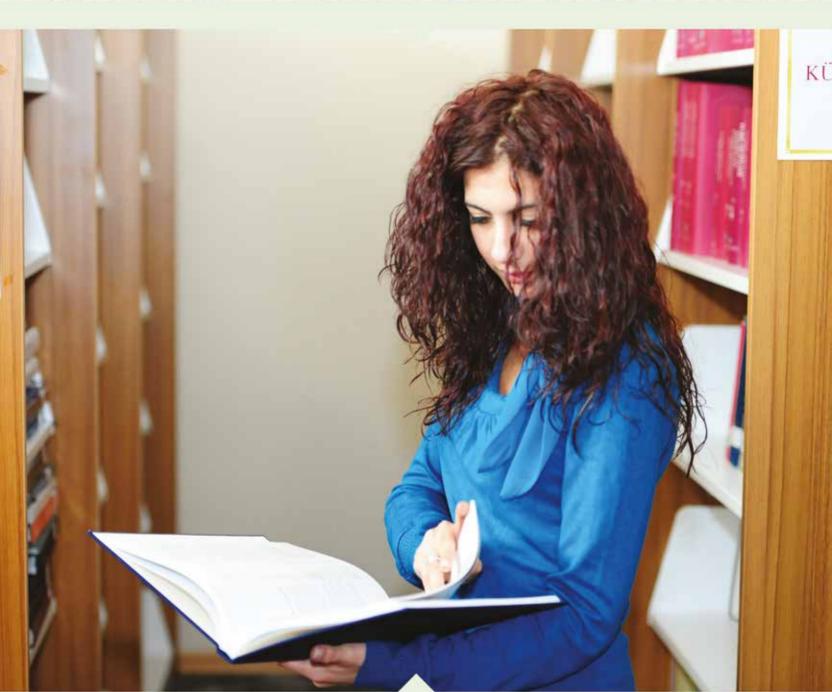

Department of Turkish Language and Literature provides job opportunities to its graduates in various fields thanks to its comprehensive curriculum. Our graduates can get job as advisor, editor, critic and translator in publishing sector. Besides this, they can get employed at media organizations, advertising agencies, consulting companies and other companies. They can also have academic positions through following graduate education; work as a Turkish Language and literature teacher in state and private high schools after having completed pedagogical formation.

OLTU STONE

Oltu stone is a semi-precious stone quarried in the northeastern part of the Oltu district of Erzurum Province. It is used for fabricating jewelry and ornaments due to its easily processable feature. Oltu stone is in black, dark brown, yellow, occasionally greenish-gray color. It is a carbon constituent. The one in black color is mostly preferred. In general, it has an important place in fabricating women's jewelry and worry beads. This stone which is peculiar to Erzurum, is quarried in the Oltu district under hard conditions, and various ornaments like worry beads, key holder, necklace, brooch, earrings, hairpin, comb, cigarette holder, ring, bracelet, cigarette case are fabricated with this stone. Oltu stone is a type of lignite that can be polished and planed, which has black, hard, bright and in the tinder form fractures. Various jewelry accessories are fabricated using Oltu stone along with gold and silver in Erzurum. Quarrying Oltu stone and carving it is extremely difficult. Due to its fragility, special devices are used for quarrying and carving it. While Oltu stone was used for fabricating prayer beads, consecrated chest and sculpture in the Middle Ages; it began to be used for fabricating jewelry in the 19th century. Nowadays, it is quarried in over 300 mines in Oltu district of Erzurum Province.

HISTORY of ERZURUM

Erzurum is situated in the eastern part of Anatolia, in south-eastern part of Erzurum plain, and in the northern side of Palandoken Mountain. It is the largest province in the highest part of Turkey situated in "The Peak of Anatolia" Mountains around Erzurum are on center of important streams of the world like Euphrates, Murat, Aras and Coruh. Mentioned mountains also play an important role in terms of winter sports. Thus the first official skiling

activities in history of Erzurum were field in Palandoken Mountain and Kiremitliktepe which is located between Palandoken Mountains and the city, back in 1915.

Erzurum, pearl of the Eastern Anatolia, is a strong and rooted province, hosted many civilizations throughout the ages. Erzurum which is the dearest of Eastern provinces in its historical lineage extending from Saltuks to Seljuks, Ottomans to Republic period has come to the forefront with its winter sports, historical artifacts, Oltu stone carving and traditional cuisine in our day.

In our city, there are many architectural works belonging to Saltuks, Seljuks and Ottomans and they drove attention as alive cultural heritage. Double Minarat Madrasa, Erzurum Great Mosque, Three Tombs and many emplacements like Aziziye, Mecidiye, Hamidiye are examples to these cultural heritages most of which dates back nearly thousand years.

Veteran city Erzurum witnessed numerous struggles during Ottoman-Russian War known as the '93 War, and Erzurum gained a prestigious ground in history with legendary figures like Kara Fatma and Nene Hatun.

Sportive activities chain starting with 2011 Winter Universiade, Erzurum proved its capability in this field with European Youth Olympics Winter Festival (EYOF) organized in 2017. Accordingly, Erzurum has a lot of social and olympic sportive centers appealing to winter tourism and sports.

Within the scope of traditional handcrafts, Oltu stone carving occupies an important place allover the city. The great harmony of silver and gold with Oltu stone springs to life in jewelry and souvenirs. Stone carving which is extremely arduous is a rich culture special to Erzurum.
